

www.dworzysko.powiat.rzeszow.pl

Rzeszowski District is the only one in Poland to have designated some of the land owned by it 83,42 ha for the purposes of the territorial development and construction of Rzeszów - Dworzysko Science and Technology Park which is currently the largest and the most attractive, completely developed investment area. Our area is mostly located within the administrative boundaries of the city of Rzeszów.

Each plot allocated for investment is fully equipped with the technical infrastructure, including electricity demand according to individual investor's needs, district heating network through which investors can take advantage of the heating system. Protection of investment areas provides comprehensive monitoring system equipped with 14 cameras. The Park has an active lightning system, which protects sites of the investment area against atmospheric discharges.

The biggest advantage of our investment zone is the location and excellent communication system. A few kilometres away is the thriving international airport "Rzeszów - Jasionka". At the

airport are offered direct air connections among others with Warsaw, Frankfurt and London operated by several airlines, including by Lufthansa, Ryanair and Lot.

We are located right by the A4 motorway and S19 expressway. The "Rzeszów - Dworzysko" Park is also located at the main railway line E30 Germany-Poland-Ukraine.

Investors will be able to count on substantial tax credits because the "Rzeszów - Dworzysko" Science and Technology Park has been included in the Special Economic Zone "Euro - Park" Mielec.

The Special Economic Zone EURO - PARK MIELEC offers public aid in the form of corporate income tax exemptions to entrepreneurs doing business in the zone against the valid business license.

Until the end of the year we sold 21 plots. The plots were purchased by investors from Poland and other European countries.
